

Environmental Policy

“Real Mecânica de Precision Eireli, upon it’s activity of manufacturing stamped, machined metal parts, assembled and welded sets, headquartered in Ribeirão Pires - São Paulo, reaffirms its commitment to environmental preservation, considering it’s environmental aspects and impacts generated as a result of it’s activities and products, adopting pollution prevention practices, as well as the sustainable use of natural resources. “

Therefore, it assumes the following commitments:

Seek continuous improvement with the adoption of best practices in it’s processes and activities, in order to:

- Reduce the consumption of natural resources,
- Reduce environmental impacts related to solid waste disposal,
- Manage your chemicals safely and responsibly.
- Comply with legislation relating to “Environmental Acoustic Phenomena – Noise & Sound”

Comply with environmental laws applicable to the business.

Continuously improve the management system, including processes, practices and activities, carrying out constant evaluation of the results by the organization's Senior Management, which will redirect the results, whenever necessary.

Encourage the employees at all levels to present suggestions for improving processes, with an eye on the environment, seeking to put them into practice.

Combating Global Warming

Invest in reducing energy consumption and energy efficiency, reduce, reuse and recycle materials, invest in low-carbon technologies and guide logistical transport to focus on low GHG emissions.

Energy Aspects

With an environmental management system implemented, it is committed to acting in accordance with legal requirements and:

- Seek continuous improvement in **energy performance** ;
- Ensure the efficient, rational and responsible use of **energy** , water, materials and natural resources;
